Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest:

a) A frequency synthesizer including an auxiliary digital frequency detector having an output terminal coupled to a second input terminal of the loop filter, in combination with the remaining claimed limitations, as called for in independent claim 2; or

b) A frequency synthesizer including means, coupled to a second input terminal of the loop filter, for making the analog mixer phase detector automatically acquire phase lock when the phase locked loop is out of lock, in combination with the remaining claimed limitations, as called for in independent claim 16; or

c) A frequency synthesizer, in which the current provided to the timing capacitor of the loop filter is provided from an integrator circuit responsive to an output signal from an auxiliary digital frequency detector whose output signal is related to a phase difference between an output signal of a programmable divider and a reference signal supplied to the auxiliary digital frequency detector, and the programmable divider is responsive to an output signal of the frequency synthesizer, in combination with the remaining claimed limitations, as called for in independent claim 19.
